Portfolio: <https://portafolio-profesional-y-responsivo.vercel.app/>

Professional Summary

Systems Engineer with a focus on Full Stack development and high-performance financial architectures. Experienced in building scalable web interface components and managing complex backend logic for global banking platforms. Specialized in optimizing the software development lifecycle (SDLC) through workflow automation, vulnerability analysis, and strict adherence to clean code principles.

Skills

- Programming Languages: JavaScript (ES6+), TypeScript, Java, Python, Go, SQL, COBOL.
- Frontend Development: React.js, Next.js, Redux Toolkit, Web Components (LitElement), Cells Framework, HTML5, CSS3, Tailwind CSS, Vite, JSX, React Router, Hooks / Custom Hooks.
- Backend Development & APIs: Node.js, Express.js, NestJS, Spring Boot, REST / RESTful APIs, Webhooks, Axios, Fetch, MVC Pattern.
- Databases & Tools: PostgreSQL, MySQL, Sequelize (ORM), Postman, ESLint.
- DevOps, Cybersecurity & Tools: Git, GitHub, Docker, Unix/Linux/Bash, JWT, Auth, Agile/Scrum Methodologies.
- Specialties & AI: Automation with n8n, Machine Learning, Artificial Intelligence, Data Analysis, Vulnerability Analysis, Cybersecurity Fundamentals.

EXPERIENCE

Softtek | Software Engineer

Mexico City, MX | March 2024 - March 2025

- Designed and engineered Full Stack solutions for global banking platforms, ensuring 99.9% reliability for critical financial operations.
- Developed over 15 reusable Web Components using the Cells framework (LitElement), reducing development time by 25% across multiple financial modules.
- Managed high-volume transaction processing on server platforms using Java (APX) and COBOL, optimizing key query performance.
- Collaborated in Agile/Scrum environments, decreasing critical production incidents by 15% through structured code reviews with ESLint and technical documentation.
- Managed version control and complex branch merging using Git and GitHub in collaborative campaigns, maintaining 100% code integrity.

Materiales Luis (Freelance) | Junior Web Developer

Mexico City, MX | August 2023 - January 2024

- Led the architectural design under the MVC model and the implementation of a Full Stack employee management platform with full CRUD functionality.
- Optimized web services and SQL database queries using Node.js and Express.js, reducing server response times by 30%.

PROJECTS

Real-Time Messaging Platform (WhatsApp Clone)

- Designed a backend messaging service using Node.js and NestJS, implementing secure authentication with JWT and Bcrypt encryption under clean code principles.
- Implemented automated communication workflows and Webhooks integration using n8n, structuring the architecture for incoming data analysis.

Weather Data Visualization Application

- Developed an asynchronous SPA using React.js, Next.js, and Tailwind CSS, consuming external APIs via Axios and managing global state with Redux Toolkit.
- Utilized browser geolocation through custom Hooks, optimizing real-time data loading to execute in less than 1.5 seconds.

Professional Web Portfolio

- Designed and built a responsive web portfolio using React.js, Next.js, and Tailwind CSS to showcase Full Stack projects and optimize professional branding.
- Implemented a clean architecture based on interactive components, optimizing resource loading speeds using Vite and ensuring optimal rendering performance.

Interactive Pokedex Application

- Developed a modular SPA (Single Page Application) using React.js and React Router for dynamic consumption of the external PokeAPI via Axios.
- Implemented global state management and advanced filtering logic with custom Hooks, achieving fluid navigation and efficient asynchronous rendering.

ACADEMIC BACKGROUND

- B.S. in Systems Engineering | Universidad Tecnológica de México (In progress, 6th Term)
- Full Stack Developer Certification | Academlo
- Web Development and HTML Certification | Google
- Introduction to Machine Learning and AI | DeepLearning.AI
